It is a fundamental condition that submitted manuscripts have not been published and will not be simultaneously submitted or published elsewhere. By submitting a manuscript, the authors agree that the copyright for their article is transferred to the publisher if and when the article is accepted for publication. The copyright covers the exclusive rights to reproduce and distribute the article, including reprints, photographic reproductions, microform or any other reproductions of similar nature, and translations. Photographic reproduction, microform, or an other reproduction of text, figures, or tables from this journal is prohibited without permission obtained from the publisher.

Special regulations for the USA.

The Article Fee Code on the first page of an article in this journal indicates the copyright owner's consent that in the USA copies may be made for personal or internal use, provided the stated fee for copyright beyond that permitted Section 107 or 108 of the United States Copyright Law is paid through the Copyright Clearance Center Inc., 21 Congress Street, Salem, MA 01970, USA. If a code does not appear copies of the article may be made without charge, provided permission is obtained from the publisher. The copyright owner's consent does not extend to copying for general distribution, for promotion, for creating new works, or for resale. Specific written permission must be obtained from the publisher for such copying.

1. The first step in the process of the development of a new product is the identification of a market need.

2. The second step is the selection of a product concept that meets the market need.

3. The third step is the development of a product prototype.

4. The fourth step is the testing of the product prototype.

5. The fifth step is the production of the final product.

6. The sixth step is the distribution of the final product.

7. The seventh step is the evaluation of the product.

8. The eighth step is the improvement of the product.

9. The ninth step is the marketing of the product.

10. The tenth step is the maintenance of the product.

11. The eleventh step is the replacement of the product.

12. The twelfth step is the disposal of the product.

13. The thirteenth step is the recycling of the product.

14. The fourteenth step is the reuse of the product.

15. The fifteenth step is the repair of the product.

16. The sixteenth step is the upgrade of the product.

17. The seventeenth step is the customization of the product.

18. The eighteenth step is the personalization of the product.

19. The nineteenth step is the integration of the product.

20. The twentieth step is the innovation of the product.
